

PLEASE NOTE OUR
ARCHITECTURAL
FOAM PRODUCTS
ARE MADE TO
ORDER. THE IMAGES
SHOWN ARE JUST
EXAMPLES.

Custom foam shapes and moldings are a cost efficient way to create beautiful architectural elements for commercial and residential purposes, while also increasing the perceived value of any construction.

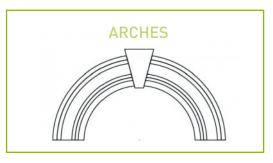

Whether you are involved in a new development, remodeling or renovating, foam shapes can be incorporated to enhance the entire project.

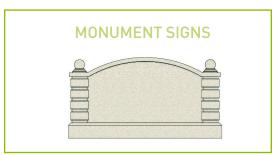

Our state-of-the-art computer controlled foam cutting system (the largest in the Caribbean), can produce any shape you require, from small and simple to large complex designs, in both expanded and extruded polystyrene foam.
